Our Expertise

- High-performance property-wide guest Wi-Fi

- Enhanced back-of-house capabilities

- Advanced services and Guest Room Entertainment integration

- Automated Guest Engagement

- Network Managed Services

- Guest-Staff-Event HSIA

Certified. Experienced. Trusted.

Cloud5 can help your hotel become compliant fast by providing you with a complete range of Marriott-approved Internet services including guest Wi-Fi, public space service, conference services, back-office access, and network management. We are one of only four North America Marriott GPNS Full-Certified HSIA providers approved to design, install, and support the managed full-service hotels and resorts of the Marriott portfolio. Cloud5 earned this prestigious certification after successfully completing rigorous product and service testing across multiple properties. In fact, Marriott awarded Cloud5 the support contracts from decertified providers for all its managed full-service and MSB hotels.

We expertly design, build, and support future-state networks, that enable seamless communication between guests and staff with technology that's designed for hospitality and trusted by Marriott.

Cloud5 is a Marriott GPNS Full Certified Provider.

Simply Better Connections

END-TO-END HSIA SOLUTIONS

- **Guest Internet** - Industry-leading guest Wi-Fi networks designed to meet the increasing demand for an always-on guest experience.

- **Back Office Internet** - Stay connected with staff throughout the hotel property.

- **Event Services** - Generate incremental revenue and deliver fast, reliable Wi-Fi services for special events and conferences with customized SSIDs, splash pages, and event coordinator monitoring and control.

MONITORING & ANALYTICS

- **Data-Driven Insights** - Provide continuous network performance analysis.

- **Hardware Agnostic** - View your network performance across all devices.

- **Comparative Benchmarks** - Evaluate performance across multiple properties

- **Detailed Metrics** - Make informed investment decisions when planning upgrades.

- **Data-Science Based Scoring** - Our algorithm calculates a site-specific Network Health Score for clear insight into network performance.

MANAGED IT SERVICES

- **PMO** - Program management, real-time dashboarding, deployment services, accountability report, and partner management.

- **Industry Acumen** - Workforce planning, technology talent, M&A preparedness, technology research, trend reports and IT consulting.

- **Technology Support** - Asset lifecycle, structured cabling, field dispatch, help desk, desktop imaging and network management.

- **Threat Mitigation** - Exposure assessments, training, audits & compliance, breach forensics, firewall deployments, and antivirus and patch management.

- **Cost Optimization** - Telco expense management, centralized procurement, cellular TEM, asset refurbishment, service bundles and pay as you go flexibility.

- **Business Intelligence** - Valuable insights for action: Cloud5 network health report, program evaluation, advisory services and space utilization.
