

Cloud5 Voice Systems

This Cloud Means Freedom

How do you deliver quality guest and staff voice service at the lowest cost, but with the ability to grow and embrace new technology? Cloud5 gives you the freedom you need to reduce costs and leverage the power of the cloud across your entire network. All with one partner.

Cloud5 offers both cloud-based and on-premise solutions to give hotels more choice in their voice systems. With more choice, hotels are gaining the flexibility, agility, and insights they need to stay ahead.

Only Turnkey Choice for Hosted Voice Solutions

- **Reduce costs** - Save up to 60% on your monthly voice costs when you move to VOIP and allow Cloud5 to replace your current carrier solution with robust, high-performance SIP trunking.
- **Choice of cloud & on-premise solutions** - Our partnership with Mitel enables Cloud5 to offer on-premise systems as well as its proven hosted PBX solutions. For on-prem users, Cloud5 Hosted Auto-Attendant supplements their functionality and supports growth by offering a migration path to a full cloud-based solution.
- **Depend on one provider** - Cloud5 is your single source for full service voice, as well as Internet, guest Wi-Fi, and network management. You can trust Cloud5's experienced team to deliver top level operational excellence and client satisfaction. Just ask any one of our more than 4,000 clients.
- **Deploy quickly and stay current** - All cloud solution configuration and programming is done centrally and you can use your legacy guest phones. Your system is continuously updated with the latest software so you always have the most current features and no upgrade/replacement costs.
- **Be future ready** - Automatically evolve with new standards and guest needs such as 911 notifications with dispatchable location, guest smartphone integration, or in-room entertainment/energy management control.

Cloud5 Advantage
