

C5 HSIA Solutions

THIS CLOUD MEANS POWER

How do you balance increasing guest demands for high-quality, reliable HSIA against the need to control bandwidth and its sky rocketing costs? Cloud5 gives you the power to satisfy guests, manage your network, as well as understand trends for your hotel or entire portfolio. Now, on one platform.

Take Control of Your Network

- **Designed to Satisfy Guests** - our experienced engineers design your network to meet the increasing needs of guests with high-volume demands across multiple devices.
- **Revenue-Generating Conference Tool** - deliver high-performance networks for both large and small events. Self-service option allows you to allocate bandwidth, assign vanity SSID, segment service levels, and more. On-site support gives you that extra confidence for major events.
- **World-Class Support** - 24X7 guest-centric support is our commitment. Three levels of customer service ensure prompt, knowledgeable staff are ready to solve problems quickly.
- **Dashboard Analytics** - understand guest usage and preferences, manage bandwidth allocation, and forecast future trends from one centralized view.
- **Simply Add Voice** - streamline daily network management and reduce costs by migrating your voice traffic to VOIP. Use the same room phones, dramatically cut monthly bills, and have one point of contact. Plus, our SIP Trunking aggregates lines, reducing costs.
- **Optimizing Technology** - leverage the latest SD-WAN technology to consolidate bandwidth, optimize traffic, and improve network performance while controlling costs. Plan ahead with 'just like home' features such as auto-authentication for single sign on simplicity.

C5 Advantage

- Pioneer of Cloud-based Networking for Hotels
- Over 4,000 Hotels, One Million Users
- Installations Across All Major Brands
- Single Source Provider
- Marriott GPNS Enhanced / Full HSIA Certification
