

Cloud5's Vendor Management

Hospitality Project Management Made Easy

Taking the chore, guesswork and stress out of common hospitality projects

Cloud5's Vendor Management offering combines the expertise of our in-house project management office with our 20+ year history in hospitality to help properties streamline, centralize and effectively manage projects - keeping them on time, on budget and within scope.

Why Now's the Time to Engage Vendor Management:

- Brands are returning to a stricter enforcement of standards, leaving hotels scrambling to assess new capital expenditures and property improvement plans that will get them back into compliance.
- The hospitality industry continues to experience chronic staffing shortages that are impacting property operations and performance, including the ability to deliver on critical new projects and initiatives.
- Hotels are implementing new technologies to meet guest demands at a rapid pace. In fact, the pandemic led to a 66% spike in technology solutions to meet guest demands.

If you're wondering how you're going to take your property's laundry list of projects from roadmap to reality, let's connect.

Cloud5 Advantage

- More than 20 years of experience in hospitality and thousands of projects under our belt
- Seasoned PM team with more than 100+ years of combined experience
- Consistent processes to standardize and scale initiatives
- Built-in failsafes and redundant checks to ensure that all project details have the necessary attention and emphasis
- Proprietary documents, automations tracking and record keeping
- Customized dashboards that empower stakeholders to review where a project stands within the life cycle

“Cloud5's PMO team helped us integrate a new company and its disparate technologies and systems into our existing portfolio. As a long-time client of Cloud5, Highgate has successfully engaged with the Cloud5 PMO team on network installations for many years, so when we found ourselves needing project management expertise, we knew where to turn.”

Richard Tudgay | CTO at Highgate
