

LOOKING FORWARD:

HOTEL CYBERSECURITY 2026

From Risk to Resilience

Percentage of hotels hit by a cyberattack in 2024

Average cost of a cyberattack in hospitality in 2025

Percentage of guests who lose brand trust after data breach

THE 5 KEY RISKS FOR 2026

1

AI-Powered Phishing → Deepfakes & Impersonations

2

Smart-Device Vulnerabilities → Unpatched IoT

3

Third-Party Exposure → Vendor Risk

4

Downtime Damage → Lost Trust and Lower Occupancy

5

Underinvestment → Limited Internal Capacity/Expertise

HOSPITALITY ACTION PLAN

ASSESS

Inventory devices & vendors

SECURE

Segment networks, patch systems

TRAIN

AI/social-engineering awareness

RECOVER

Test backups & response drills

PARTNER

Managed Security Partner (MSSP)
